Abstract:	<p>The collection is comprised of NJ State Historical Site Evaluation Worksheets. Forty-one sites have been evaluated, and each includes the worksheet, a map and commentary. Photographs have been provided for many of the sites, as have the related negatives. All the sites are located in Hunterdon County.</p> <p>Dr. Johnson has provided an index that divides the sites by category. There are twenty-seven possible categories, fourteen of which are represented, three have notes that they will be sent at a later date, and the rest are excluded.</p>

PROJECT NOTES: Edward Johnson, PhD. (English) was a member of the Hunterdon County Historical Society. From 1960-61 he was the Chairman of the Hunterdon County Committee on Historic Sites and Structures, and conducted this survey as a private endeavor paid for by D. Howard Moreau, solely for the good of the county. Dr. Johnson established his own criteria for selecting the sites. This helps to explain the absence of several prominent historical structures. Johnson's survey was used circa 1975 as a source for the formal, state-funded historical survey conducted by the Hunterdon County Historical Society.

Johnson conducted these surveys with the assistance of several researchers and photographers. Many of the photographs were taken by Michael Ciavolino, of Clinton NJ, who was assisted by Doug Martin. Ed Johnson gave this collection to Walter "Bud" Young, a trustee of the Hunterdon County Historical Society,

sometime during the 1960s. Mr. Young donated the collection to HCHS sometime during the 1970s.

SCOPE AND CONTENT

The Hunterdon County New Jersey Historic Site Survey Collection consists of forty-three folders, one of which contains the index, and one other containing extra worksheets. Every folder contains a worksheet; most folders also contain photographs and the matching negatives. Commentaries have been created for each site documenting its history, information about the building, and when appropriate, the history and documentation of the people and the historical significance of the area. The commentaries note works cited, references, individual correspondence about the site as well as ancillary information.

Folders may contain from four to thirty items. The majority of the papers are type written with handwritten notations. The surveys were conducted over a period of two years, beginning in 1960 and ending in 1961.

Handwritten notes on the index sheets reference items and categories to be included by 1975. This has not occurred as of 1/06/11. While the survey does not appear to be complete, this collection offers a glimpse into the importance of the selected sites as of 1961. Based on the included reference materials, mapped locations and lists of works cited, this collection can provide geographical and historical content and background on the buildings in Hunterdon County of historic value.

CONTAINER LIST:

Series 1:		Site Evaluations
Box/Folder		Contents
1	1	<p>The Check List for Locating Historic Sites and Structures. This list is used to jog the memory of citizens who may have an interest in, or information about the variety of historic sites located in Hunterdon County NJ. An Index consisting of four pages; numbered, categorized and described in brief.</p> <p>[Arranger's Note]</p> <p>There is a four-page index of categories. Each category is determined by the Check List, and referenced to the appropriate number. For example, "Architecture" is the second listed, as (2), and is referenced as #3, according to the Check List. Each category lists the number, name, location and a short description of each site that was evaluated. There are 17 Categories listed and each contains from (1) to (6) sites. Category #1 Archeology, Category #8 Indians, and sites 2 and 3 from Category #17 Medicine, have handwritten notes, dated May 18, 1975, that they will be sent later. Several of the categories from the Check List have no reference.</p>
